

Hunt Global Resources
Plans 2012 construction of frac-sand processing plant in Conroe, Texas

HOUSTON--(BUSINESS WIRE) December 6, 2011 -- Hunt Global Resources Inc. (OTCBB:[HGCO](#)) today announced it plans to build a 1-Million ton per year frac-sand mining and processing facility on its 350 acre site, located in Conroe Texas. The property contains approximately 21 million tons of marketable frac-sand.

“The current boom in oil shale drilling here in the South West, has created a resurging demand for local frac-sand” said George T. Sharp, CEO of Hunt Global Resources Inc. “We are currently in discussions with several large oil and gas service companies’, desiring to purchase frac-sand from the mine, once it’s in production”, Mr. Sharp continued.

“Texas frac sand, often referred to as “Brady” sand, has historically been undervalued by oil and gas drillers who used the more expensive Northern sands that can withstand the high pressures encountered while drilling thousands of feet below the surface.

However, Hydraulic fracturing in shallower depths, has made it possible for production companies to achieve greater efficiencies by using Brady sand that has a lower crush resistance, and is much less expensive, costing an average of \$40 to \$60 per ton compared to Northern White sand costing \$80 to \$150 per ton.

Hunt Global is well positioned to capitalize on providing both types of sands, as we are in the process of completing the necessary engineering and environmental studies required for permits that will allow mining on a 900 acre site located in Minnesota.

Hunt plans to begin mining that location, which contains approximately 100 million tons of marketable Northern White frac sand, once permits are issued,” concluded Mr. Sharp.

About Hunt Global Resources, Inc.

Hunt Global Resources, Inc. (OTCBB: HGCO) is a natural resource & recycling company, focusing on specialty sands called “frac” sand, which is an essential component in the production of oil and gas. The Company’s current holdings include the mining rights to 350-acres in Conroe Texas, containing high-grade sand deposits and approximately 21-million tons, of high value frac-sand. Hunt also entered into an agreement that will allow the Company to acquire the mining rights to additional 900-acres of land containing an estimated 100-million tons of Northern White frac-sand, which is considered the premier sand in the industry. The Company’s holdings include a state-of-the-art 40-million gallon industrial biofuels manufacturing plant located near the Houston ship channel. Hunt intends to utilize the plant’s excess resources and capacity to support a frac-sand resin coating operation to further increase the value of its frac-sand holdings. Hunt also acquired Carbon Green NA, which is the only patented tire recycling process that recycles 100% of the components of scrap tires with a zero carbon footprint. Hunt has license agreements to distribute the technology in Europe, China and South America. Hunt plans to build up to 10-plants in North America.
